Aide Solar Expands U.S. Market Reach with Green Fuel Solar Distribution Agreement

Domestic source of photovoltaic modules from Aide Solar combined with design and engineering expertise of Green Fuel Solar provides time-to-market and service advantage

SAN FRANCISCO, Intersolar North America., – July 15, 2009 — [Aide Solar](#), a large-scale producer of photovoltaic modules, today announced it has entered into a distribution agreement with Green Fuel Solar, an alternative energy company involved in the sales and installation of residential and commercial solar and electric systems in Arizona, Colorado, Texas and Nevada. The distribution agreement with [Green Fuel Solar](#) is expected to be the first of several agreements to be signed by Aide Solar as it expands its U.S. market reach following the recent opening of its North American headquarters in Tempe, Arizona.

“Green Fuel Solar has an established channel to market and business approach that focuses on adding value to the customer throughout the sales process,” said [Raymond C. Wiley](#), director, North America Sales, Aide Solar, U.S.A. “Their design and engineering expertise combined with an outstanding reputation in the industry makes Green Fuel Solar an excellent fit as our first distribution partner. We look forward to building a long-term relationship that will help drive growth for both companies in the coming years.”

Aide Solar is a subsidiary of [The Panjit Group](#), a broad based manufacturer of leading-edge technologies headquartered in Taiwan with a semiconductor fabrication facility in Tempe, Arizona. The Panjit Group’s U.S. semiconductor manufacturing facility offers Aide Solar a future path for a vertically integrated business model as well as a robust new product development pipeline.

“Aide Solar’s U.S.-based inventory provides a quality, local source of photovoltaic modules which translates into a shorter time-to-market and eliminates shipping costs for the small-to-mid-size installer network,” said Dustin Hamby, president Green Fuel Solar. “This agreement provides us with the ability to expand our customer base for the commercial, residential and utility scale markets and execute our aggressive expansion plans in the coming months.”

Green Fuel Solar offers professional solar Power Purchase Agreements, modeling, project funding and design services for a wide array of solar applications including residential and commercial system design. These services include solar project feasibility studies, structural and

electrical engineering, system performance projections, financial performance projections, plans drafting, building permit application submittals, and the writing of solar RFPs. Green Fuel Solar is also offering any installer using Aide Solar modules an Installer warranty reimbursement to cover any manufacturing defects or service costs.

For more information on Aide Solar, please visit the company July 14-17 at [Intersolar America](#), booth #8417, Moscone Center, San Francisco. InterSolar is the most diverse international business-to-business trade show in the United States for the global solar industry.

About Aide Solar

Aide Solar is a large-scale producer of photovoltaic modules with North American headquarters in Tempe, Arizona. Based in Xuzhou City, China, Aide Solar was established in 2003 and became a subsidiary of the Taiwan-based Panjit Group in 2007. Ranked as one of China's leading solar panel manufacturing companies with customers worldwide, Aide Solar is committed to technology innovation and providing the best customer experience in the industry.
