Aide Solar Broadens Product Portfolio to Include “Green” Outdoor LED Lighting Solution

Domestic source of Aide Solar panels and low-temp LED Panjit Lighting provides systems integrators and installers with quick options for outdoor illumination

SAN FRANCISCO, Intersolar North America., – July 14, 2009 — Aide Solar, a large-scale producer of photovoltaic modules and a subsidiary of The Panjit Group, a broad-based manufacturer of leading-edge technologies headquartered in Taiwan, today announced a solar-powered outdoor lighting solution that features maximum brightness and design flexibility with superior energy efficiency. The recent opening of Aide Solar’s North American headquarters in Tempe, Arizona combined with its access to other technologies found within The Panjit Group, ideally positions Aide Solar to broaden its product portfolio and offer a “green” solution to system integrators and installers serving the outdoor lighting market.

Aide Solar will market Panjit Lighting’s “OSS” outdoor LED lighting series that can be configured in a matrix formation and housed to maximize the illumination of the target area, along with its photovoltaic modules to power the outdoor lighting solution.

“The ability to leverage products and technologies from our sister companies within The Panjit Group is without question an advantage for us,” said [Raymond C. Wiley](#), director, North America Sales, Aide Solar, U.S.A. “We have key building blocks at our disposal to offer our customers an energy efficient ‘solution’, not just a product.”

The outdoor solar LED lighting solution from Aide Solar is on display in booth #8417 at [Intersolar America](#), Moscone Center, San Francisco. Intersolar is the most diverse international business-to-business trade show in the United States for the global solar industry.

About Aide Solar

Aide Solar is a large-scale producer of photovoltaic modules with North American headquarters in Tempe, Arizona. Based in Xuzhou City, China, Aide Solar was established in 2003 and became a subsidiary of the Taiwan-based Panjit Group in 2007. Ranked as one of China’s leading solar panel manufacturing companies with customers worldwide, Aide Solar is committed to technology innovation and providing the best customer experience in the industry.
